

BCBSNM/HMONM Drug List (Formulary) 2004

**Blue Cross and Blue Shield
of New Mexico**
A Division of Health Care Service Corporation, a Mutual Legal Reserve Company.

HMO New Mexico
Independent Licensees of the Blue Cross and Blue Shield Association.

LEGEND:

MDL	Managed drug limitations
PA	Prior authorization required
ST	Step therapy
boldface	Indicates generic is available
CAPITAL	Indicates brand-name drug
lowercase	Indicates generic drug name

Some medications are available under multiple product names. If you cannot find the name of your medication in the Drug List, ask your physician or pharmacist if the medication could be listed under another product name or if an alternative medication may be an option.

Click on any letter below to find drug names listed in alphabetical order.

[A](#) | [B](#) | [C](#) | [D](#) | [E](#) | [F](#) | [G](#) | [H](#) | [I](#) | [J](#) | [K](#) | [L](#) | [M](#) | [N](#) | [O](#) | [P](#) | [Q](#) | [R](#) | [S](#) | [T](#) | [U](#) | [V](#) | [W](#) | [X](#) | [Y](#) | [Z](#)

The Pharmacy and Therapeutics Committee meets quarterly and reviews this Drug List for possible additions/deletions. Members are notified in the *Blues Healthline* newsletter, and Providers are notified in the *Provider News Brief* newsletter of any changes to the Drug List. (**Note:** some drugs may require prior approval and/or may be limited to specific quantities.)

3-Tier Prescription Drug Plan

Not all members currently have the 3-Tier plan, but for those who do, the following information may be helpful in understanding this benefit.

Drug costs continue to rise faster than any other component of health care. The 3-Tier prescription drug plan allows you to make choices and helps us keep your premiums affordable. Unlike other prescription drug plans, this plan allows you to get a prescription drug even if it's not on the list and to get a brand-name drug even when there is a generic-equivalent available. Make sure to have your prescriptions filled at either a participating pharmacy (see the Provider Network Directory) or through the Managed Prescription Mail Service program.

Your Out-of-Pocket Costs

Your copayment is based on two points:

- whether you are receiving a generic drug or a brand-name drug **AND**
- whether the drug is on our Drug List (formulary)

Tier 1=lowest copayment	Tier 2=middle copayment	Tier 3=highest copayment
You pay this amount when you receive a generic drug that is on our Drug List.	You pay this amount when you receive a brand-name drug that is on our Drug List and no generic is available.	You pay this amount when you receive a drug that is not on our Drug List.

If you or your doctor prefer that you receive a brand-name drug when a generic equivalent is available, you'll pay additional costs:

For a brand-name drug that is on our Drug List (generic is available)	For a brand-name drug that is NOT on our Drug List (generic is available)
You will pay: The Tier 1 copayment PLUS the difference in cost between the generic and brand-name drug.	You will pay: The Tier 1 copayment PLUS the difference in cost between the generic and brand-name drug.

How to save money with this plan

- Ask your doctor to prescribe drugs for you that are on our Drug List (formulary).
- When available, use generic-equivalent drugs instead of brand-name drugs. Remember that if a generic drug is not available, you will have to pay Tier 2 for a drug on our Drug List or Tier 3 for a drug not on our Drug List.
- Use the Managed Prescription Mail Service if you are on medication for a chronic condition such as high blood pressure. It allows you to get up to a 90-day supply of your medication for only two copayments.

What is a drug list (formulary)?

The BCBSNM/HMONM Drug List (formulary) is a list of drugs that are available to members at lower copayment levels. Drugs not on the list are still covered but require a higher copayment. The BCBSNM/HMONM Pharmacy and Therapeutics Committee (made up of physicians and pharmacists) evaluates drugs for therapeutic uniqueness, safety, and cost before including them on the Drug List. Your physician has a copy of our Drug List and should consult it when making prescription drug decisions for you.

Are generics as safe as the brand-name drug?

Generic drugs are evaluated by the Food and Drug Administration and undergo the same scrutiny as brand-name drugs. A generic-equivalent drug must have the same active ingredients and be chemically equivalent to the brand-name drug. Only generic drugs that have the same clinical effects and safety profile as the brand-name drug are covered under BCBSNM plans.

Can I use a medication that my doctor prescribes if it is not on the Drug List?

Yes, drugs not listed are covered with BCBSNM's 3-Tier prescription drug plan. You have benefit coverage for most drugs, even if they are not on the Drug List. You will pay the highest copayment level (Tier 3).

Phone number for questions...

You should discuss questions and concerns about drugs that you are taking with your physician. He or she can discuss whether a BCBSNM listed medication is appropriate for you. If you have any questions about your prescription drug benefits, call our Prescription Drug Inquiry Unit at (800) 325-8334, extension 5.
