## INTRODUCTION

Blue Cross and Blue Shield of New Mexico (BCBSNM) presents the Drug List for BlueSalud members. The Drug List includes many common generic drugs and brand drugs covered by Blue Cross and Blue Shield of New Mexico. Please take this Drug List with you when visiting your doctor. Ask your doctor to write prescriptions for generic drugs or the brand drugs on the Drug List whenever possible. BlueSalud members also have a select list of Over-the-Counter (OTC) products that are covered with a doctor's prescription.

## PRESCRIPTION BENEFITS

All generic drugs are covered for BlueSalud members. This Drug List only includes commonly used generic drugs. Other generic drugs that are not shown on the Drug List are covered for members. Covered brand drugs are limited to those shown on this Drug List. Drugs for some uses are not covered (example: for hair growth). Generic Over-the-Counter (OTC) drugs are covered for BlueSalud members only. Only the generic OTC drugs that are on the OTC list are covered. The OTC list is on page 5-7.

Prescriptions filled at a retail pharmacy are limited to a 30-day supply or 120 tablets or capsules, whichever is less. BlueSalud members who fill a 30-day supply of a drug taken on a regular basis (example: for high blood pressure) can get a 90-day supply through our mail order or retail network pharmacies. You may have to pay a copayment for each prescription.

Drugs that are not used on a regular basis may also have a limit on the amount that you may receive over a certain length of time. Drugs that have dispensing limits have **"DL"** next to them in the Drug List. The list of drugs with DL is on page 4.

Your doctor may have to request approval to prescribe some of the generic and brand drugs on the Drug List. Drugs that need approval or Prior Authorization have **"PA"** next to them in Drug List. The list of drugs that require PA is on page 3.

Specialty Pharmacy drugs also require PA and a prescription for a Specialty Pharmacy drug can only be filled at a Specialty Pharmacy supplier. The list of Specialty Pharmacy drugs is on page 3.

Brand drugs in the Step Therapy program may require that you have tried a generic drug before a brand drug will be covered. Drugs that require the use of a generic drug first have **"ST"** next to them in the Drug List. The list of drugs in the Step Therapy program is on page 4.

## GUIDE TO BCBSNM DRUG LIST FOR BLUESALUD MEMBERS

The Drug List groups drugs by type of drug (examples: penicillins, insulins) or by what the drugs are used for (examples: cancer drugs, diabetes).

Generic drugs are shown in lowercase, **boldface** type. The generic name is followed by the brand-name drug (in parentheses). The brand drug is shown because you and your doctor may be more familiar with the brand name than the generic name. A brand drug that is shown in parentheses is not covered; only the generic drug is covered.

Example: **atenolol** (Tenormin)

Brand drugs are shown in capital letters, and are followed by the generic name of the drug. The brand drug is covered if shown this way.

Example: DIOVAN – valsartan

Most strengths and dosage forms for a drug are covered. Exceptions are typically noted.

Example: **atenolol** (Tenormin)

The generic drug atenolol comes in 25 mg, 50 mg, and 100 mg tablets. Each strength is available as a generic. All generics are covered. The brand drug Tenormin is not covered.

Drugs are taken in different ways and used on different parts of your body. Most tablets, capsules, and oral liquids are swallowed. You may place other drugs under your tongue or the drug may dissolve in your mouth. Other drugs are used on your skin, in your eyes or nose, inhaled into your lungs, etc. Drugs that have special dosage forms or are used in different ways are listed separately in the Drug List.

## GENERIC SUBSTITUTION

The BlueSalud drug benefit requires that generic drugs be substituted for a brand drug when possible. BCBSNM supports this rule because generic drugs are approved by the U.S. Food and Drug Administration (FDA) and are produced under the same strict FDA standards required for brand products.

A generic drug is the same as the brand drug in:

- Effectiveness
- Safety
- Dosage form
- Strength
- Quality
- The way it works
- The way it should be used

Generic drugs may not look exactly like the brand drug. Color, flavor, and shape may be different. But these things don't affect the way the drug works. Generics are equally safe and effective compared to brand drugs. Generics are also usually less expensive.

## PRIOR AUTHORIZATION (PA)

The following products require Prior Authorization (PA). For updates on drugs requiring PA, please check our website at [www.bcbsnm.com](http://www.bcbsnm.com). To request PA, your doctor should call 1.866.689.1523.

Over-the-Counter (OTC) drugs are covered for BlueSalud members only, are limited to specific drugs, and dispensing limits apply. Enteral feeding food/nutritional products are covered for all members and prior authorization is required (see page 3).

**It is important that you show this OTC list to your doctor so he/she knows what drugs are available for the OTC benefit.**

Members need a doctor's prescription to have an OTC drug covered at a pharmacy. The pharmacist will pick the package (brand and quantity) to use when filling the OTC drug prescription.

The following OTC drugs are covered in this program. The OTC List notes drugs that are available as generics by their generic name and in lowercase, **boldface** type. A common brand drug is noted in parentheses after the generic name for many products to help identify the covered drug. If a generic is available, a generic will almost always be dispensed in this program. Drugs that are available only as brands are noted by the brand name and are shown in capital letters.
