

Reimbursement Policy

Policy Number: RP040

Policy Title: Physical Medicine and
Rehabilitation Services

Approval Date: Sept. 21, 2026

Effective Date: Dec. 31, 2026

Policy Disclaimer

If a conflict arises between a Reimbursement Policy and any Plan document under which a member is entitled to covered services, the Plan document will govern. If a conflict arises between a reimbursement policy and any provider contract pursuant to which a provider participates in and/or provides covered services to eligible member(s) and/or plans, the provider's contract will govern. "Plan documents" include, but are not limited to, Certificates of Health Care Benefits, Benefit Booklets, Summary Plan Descriptions and other coverage documents. Blue Cross and Blue Shield of New Mexico may use reasonable discretion interpreting and applying this policy to services being delivered in a particular case. BCBSNM has full and final discretionary authority for their interpretation and application to the extent provided under any applicable Plan documents.

Providers are responsible for submitting accurate documentation of services performed. Providers are expected to submit claims for services rendered using valid code combinations from Health Insurance Portability and Accountability Act approved code sets. Claims should be coded appropriately according to industry standard coding guidelines including, but not limited to: Uniform Billing Editor, American Medical Association, Current Procedural Terminology (CPT®) Assistant, Healthcare Common Procedure Coding System, ICD-10-CM and ICD-10-PCS, National Drug Codes, Diagnosis Related Group guidelines, Centers for Medicare & Medicaid Services National Correct Coding Initiative Policy Manual, CCI table edits and other CMS guidelines.

Claims are subject to the code edit protocols for services and procedures billed. Claim submissions are subject to claim review, including but not limited to, any terms of benefit coverage, provider contract language, medical policies and reimbursement policies, as well as coding software logic. Upon request, the provider is urged to submit any additional documentation.

Description

This policy provides general information on billing and claims processing for physical medicine and rehabilitation services. Coverage decisions are subject to all terms and conditions of the applicable benefit plan, including specific exclusions and limitations, and to applicable state and federal mandates or laws. Providers are urged to contact the Plan for specific coverage.

Definitions

Durable Medical Equipment - Equipment that can withstand repeated use, is primarily and customarily used to serve a medical purpose, is generally not useful to a person in the absence of illness or injury and is appropriate for use in the home.

Home Setting- Includes the following- (1) The member's dwelling, such as a house, apartment, or other private living space; (2) A relative's home if the member resides there; (3) A place of residence used as a home or place of dwelling; (4) A Senior Living Community (not including skilled nursing facilities), e.g., retirement home or assisted living facility.

Modalities - Any physical agent applied to produce a therapeutic change to biological tissue; includes, but is not limited to, thermal, acoustic, light, mechanical, or electrical energy.

Supervised: Provider needs to watch over the application, though not necessarily at the patient's side. These modalities are procedure/service based, untimed and in units of one per encounter.

Constant Attendance: Provider must be with the patient at all times. These are time-based, one unit = 15 minutes.

Prescription/Written Order - A written prescription/order is a written communication from a treating provider that documents the need for a member to be provided with an item of durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) and/or services.

Qualified Healthcare Professional - Is an individual who is qualified by education, training, licensure/regulation (when applicable), and facility privileging (when applicable) who performs a professional service within their scope of practice and independently reports that professional service.

Therapeutic Procedure - A manner of affecting change through the application of clinical skills and/or services that attempt to improve function.

Reimbursement Information

Providers are to document and bill appropriately for all services submitted. The Plan reserves the right to request supporting documentation. Failure to adhere to coding and billing policies may impact claims processing and reimbursement.

Coding Standards

- Proper coding is essential for correct reimbursement.
- Diagnosis and procedure coding with accurate corresponding date of service.

Diagnosis Codes

- New ICD10-CM diagnosis codes are updated bi-annually in April and October.
- Some diagnosis codes require a 7th digit to code to the highest specificity.
- Update diagnosis and coding for every new episode, including a re-exam or an examination for a 'new' problem. Providers should document any diagnosis coding change even if it is minor.
- Link the diagnosis to the service provided. For example:
 - When performing manual therapy with manipulation, the diagnosis pointer code(s) should point to the specific diagnosed condition that supports the specific procedure billed. (Box 24E of the CMS-1500 claim form).

Physical Medicine & Rehabilitation Codes

Providers must submit the most appropriate code(s) for physical medicine and rehabilitation services as described under the *"Physical Medicine and Rehabilitation"* section in the most current publication of the American Medical Association (AMA) Current Procedural Terminology (CPT) Code Book. To ensure proper reimbursement for physical medicine and rehabilitation services, the following conditions must be documented to support the usage of the CPT codes:

- The therapy must be of a skilled nature and require the services of a qualified healthcare provider.
- Maintenance Therapy may be appropriate if skilled therapy services by a qualified healthcare provider are required to maintain functional status or to prevent or slow further deterioration of functional status.
- When services are delegated, documentation must include details of what was delegated and who performed the service(s).
- Services performed must achieve a specific diagnosis-related goal.
- Physical therapy for performance of athletic conditioning is not reimbursable by the Plan.

The following are commonly used physical medicine & rehabilitation therapeutic procedure codes. This is not an all-inclusive list.

CPT Code	Description	Additional Information
97110	Exercise Therapy 1 or more areas, each 15 minutes	Documentation must include: 1. The specific exercises performed. 2. The purpose of the exercises as related to function; and 3. The start and stop times of the treatment or at a minimum, the direct one-on-one contact time spent on each individual activity. These exercises should require the skills of a qualified healthcare professional. Supervising patients who are exercising independently is not a skilled service. The expected functional performance improvement should be discernable in the records.
97112	Muscle or nerve training 1 or more areas, each 15 minutes	Documentation must include: 1. The specific exercises/activities performed. 2. The purpose of the exercises/activities as related to function; and 3. The start and stop times of the treatment or at a minimum, the direct one-on-one contact time spent on each individual activity. These activities should require the skills of a qualified healthcare professional. Supervising patients who are performing activities independently is not a skilled service. The expected functional performance improvement should be discernable in the records.

		Use of CPT 97112 may be appropriate for neuromuscular re-education to restore prior function. CPT 97112 is not appropriate for providers using soft tissue mobilization techniques. Requires direct one-on-one patient contact throughout the procedure. Provider is required to maintain visual, verbal, and/or manual contact with the patient. Appropriate chiropractic manipulative treatment (CMT) codes may be reported in addition to CPT code 97112 if performed in a spinal region outside of the manipulation.
97140	Body movement therapy 1 or more regions, each 15 minutes	Documentation must include: 1. The area being treated. 2. The therapy technique being used; and 3. The start and stop times of the treatment or at a minimum, the direct one-on-one contact time spent on each individual activity. The manual therapy performed should require the skills of a qualified healthcare professional. The expected functional performance improvement should be discernable in the records. CPT code 97140 should not be used interchangeably with CPT codes 98940-98943 or 97124. Appropriate CMT codes may be reported in addition to CPT code 97140 if performed in

		a body region outside of the manipulation. If a CMT is the only service performed, it is inappropriate to bill for multiple time-based codes, e.g., billing 97140 for several manual therapies. Note, a CMT CPT code may not be replaced with a different CPT code if the CMT was the actual service performed. It is a requirement to use the code that best describes the services rendered.
97530	Activity therapy Each 15 minutes	Documentation must include: 1. The area being treated. 2. The specific activity or technique being used; and 3. The start and stop times of the treatment or at a minimum, the direct one-on-one contact time spent on each individual activity. The activities should require the skills of a qualified healthcare professional. Supervising patients who are exercising independently is not a skilled service. The expected functional performance improvement should be discernable in the records.

Physical Therapy Evaluation

The following codes are associated with physical therapy evaluation services. Inclusion of a code below does not guarantee reimbursement.

CPT Code	Description
97161	Exam for physical therapy; Low complexity
97162	Exam for physical therapy; Moderate complexity
97163	Exam for physical therapy; High complexity
97164	Evaluation of physical therapy; Re-evaluation

Occupational Therapy Evaluation

The following codes are associated with occupational therapy evaluation services. Inclusion of a code below does not guarantee reimbursement.

CPT Code	Description
97165	Exam by occupational therapist; Low complexity
97166	Exam by occupational therapist; Moderate complexity
97167	Exam by occupational therapist; High complexity
97168	Exam by occupational therapist; Re-evaluation

Evaluation and Management (E/M) Services (CPT Codes: 99202-99215, 99242-99245, 99499)

To bill for an E/M service, the complete CPT guidelines must be met for each service. The service must also be separately identifiable and distinct from any other service performed on the patient that day. The Plan will not reimburse Physical and Occupational Therapists or Physical and Occupational Therapy Assistants for CPT evaluation and management codes noted above.

Modifiers

For the purposes of this policy, a modifier may be appended to denote additional information about the service rendered.

CO	Outpatient occupational therapy services furnished in whole or in part by an occupational therapy assistant
CQ	Outpatient physical therapy services furnished in whole or in part by a physical therapist assistant
GO	Services delivered under an outpatient occupational therapy plan of care
GP	Services delivered under an outpatient physical therapy plan of care
96	Habilitative services
97	Rehabilitative services

Reporting Units for Timed Codes:

Some CPT codes for modalities are considered experimental, investigational, and/or unproven (EIU) and are not covered by the Plan. However, some modalities may be eligible for reimbursement, and the following information would apply:

When multiple units of therapies or modalities are provided, the 8-minute rule must be followed when billing for these services. A provider should not report a direct treatment service if only one attended modality or therapeutic procedure is provided in a day and the procedure is performed for less than 8 minutes.

- The time reported should be the time actually spent in the delivery of the modality and/or therapeutic procedure. This means that pre- and post-delivery services should not be counted in determining the treatment time.
- The time that the member spends not being treated, due to resting periods or waiting for a piece of equipment to become available, is not considered treatment time.
- All treatment time, including the beginning and ending time of the direct treatment, must be recorded in the member's medical record, along with the note describing the specific modality or procedure.
- Each minute of time may only be counted once. Any actual time the therapist uses to attend one-on-one to a member receiving a supervised modality cannot be counted for any other service provided by the therapist.

A unit of time is attained when the mid-point is passed.

For example:

- For services billed in 15-minute units, it would not be appropriate to report services performed for less than eight minutes.

For any single timed CPT code in the same day measured in 15-minute units, providers must use a single 15-minute unit for treatment greater than or equal to 8 minutes through and including 22 minutes.

Time intervals for 1 through 8 units are as follows:

Unit	Time
1	≥8 mins to 22 mins
2	≥23 mins to 37 mins
3	≥38 mins to 52 mins
4	≥53 mins to 67 mins
5	≥68 mins to 82 mins
6	≥83 mins to 97 mins
7	≥98 mins to 112 mins

8	≥113 mins to 127 mins
---	-----------------------

If billing for more than one modality/therapy, time should not be combined to report units. Each unit for the modality/therapy is reported separately for each code.

Durable Medical Equipment (DME)

Prescription/Written Order for DME Supplies

A prescription/written order must be readily available if requested for DME rentals or purchase. The prescription/written order must be signed by the members treating qualified healthcare professional. When a qualified healthcare professional completes and signs the prescription/written order, they are attesting that the information indicated on the form is correct and that the requested services are necessary and appropriate. Provider's prescription/written order for refills must be renewed at a minimum annually depending on the therapy, device, item, or service needs.

The prescription/written order for DME must include the following:

- Member's name, date of birth
- Diagnosis (Dx)
- Description of the type of equipment/supplies ordered
- Ordering provider's rationale for requesting the equipment
- Date of prescription/order
- Date and duration of expected use
 - If appropriate add the length for the need, the frequency of usage, and the refill frequency.
- Quantity (if applicable)
- Ordering provider's name, address, and telephone number
- Ordering provider's legible signature and date

DME Components and Accessories

Repair, adjustment, or replacement of components and accessories of DME, as well as supplies and accessories necessary for effective functioning of covered DME items should be billed with the code which best describes the DME item. For example:

- When ordering Transcutaneous Electrical Nerve Stimulation (TENS) replacement products, it would be appropriate to utilize CPT code A4595 (electrical stimulator supplies) as opposed to the following CPT codes separately- A4556 (electrodes), A4557 (leads), A4558 (conductive paste or gel), and A4630 (replacement batteries).

Certain Customized DME

Customized DME or prosthetic and orthotic devices are specifically constructed to meet member's specific need. An invoice should be included with billing for any customized DME or prosthetic and orthotic device for which a procedure code or HCPCS code does not exist.

The following are examples of items that should not be billed for customized DME and/or prosthetic and orthotic devices:

- An adjustable brace with Velcro closures
- A pull-on elastic brace
- A lightweight, high-strength wheelchair with padding added

The following additional criteria apply to custom-fitted and custom fabricated back braces:

- A custom-fitted back brace (a prefabricated back brace modified to a specific member) is considered necessary where there is a failure, contraindication, or intolerance to an unmodified, prefabricated (off the shelf) back brace.
- A custom-fitted back brace is considered necessary as the initial brace after a surgical stabilization of the spine following traumatic injury.
- A custom-fabricated back brace (individually constructed to fit a specific member from component materials) is considered necessary if there is a failure, contraindication, or intolerance to a custom-fitted back brace.

Components of a Written Radiology Report

As a written record of the interpretive findings, the radiology report serves as an important part of the member's medical record and must contain the following items:

- Patient identification
- Location where studies were performed
- Study dates
- Types of studies
- Radiographic findings
- Diagnostic impressions; and
- Legible signature with professional qualifications included

Radiology reports may also include recommendations for follow-up studies and comments for further patient evaluation.

Policy History

Approval Date	Description
03/15/2023	New Policy: Split from CPCP016 Chiropractic Care Services
01/12/2024	Annual Review
06/12/2025	Annual Review; Grammatical and formatting updates; Sections revised- Definitions: Home Setting updated; Coding Standards: Revised language; Diagnosis Codes: Additional month added; Physical Medicine & Rehabilitation Codes, bullets removed, table added. CPT code 97140: CPT code 98943 added to Additional Information column; Physical Therapy Evaluation section added; Occupational Therapy Evaluation section added; Modifiers 96 and 97 added to Modifiers table; Reporting Units for Timed Codes, bullets removed, and table added; Durable Medical Equipment section revised, new bullet for frequency added; Certain Customized DME revised, new bullet for convenience added; Additional Resources and References updated.
11/05/2025	Update: Grammatical and formatting updates; Removed from Additional Resources: Medical Policies DME101.041 and DME101.046. Effective January 1, 2026, these policies are moving to MCG Criteria, see Medical Policy ADM1001.036.
09/21/2026	Annual Review; Retired MED POLICY THE803.088 removed and MED201.033 added as Additional Resource.
