Screening for Clinical Depression Initiative

Although many patients may present to their provider’s office with nonspecific physical symptoms consistent with depression such as pain, poor sleep or poor appetite, their comorbid diagnosis of depression may go unrecognized.

Providers may not have the tools or the time needed to screen or treat such patients. Blue Cross and Blue Shield of New Mexico (BCBSNM) understands these challenges and wants to help.

Did you know?

• Major Depressive Disorder (MDD) remains a treatable cause of pain, suffering, disability and death.
• Primary Care Clinicians detect MDD in one-third to one-half of their patients and about half of these go untreated.
• Additionally, more than 80% of patients with depression have a medical comorbidity.

For questions, you may contact your Provider Representative or email Behavioral Health Quality Improvement at BHQualityImprovement@bcbstx.com.

What will you need to know and how may we help?

• BCBSNM reimburses providers that participate in the Blue Cross Community Centennial network for administering an annual depression screening tool using procedure code G0444 (administration).
• Results are reported simultaneously with either G8431 (positive screen with plan) or G8510 (negative screen) result code. Starting July 1, 2017, and through December 31, 2018, additional reimbursement will be provided for G8431 and G8510.
  - Add the modifier, U8, in the modifier section on the CMS 1500 when submitting the claim that includes G0444 with the addition of either G8431 or G8510.
  - Any reimbursement will be made according to Blue Cross Community Centennial medical/reimbursement policies for services and other billing and reimbursement practices.
• This tool kit includes a sample Patient Health Questionnaire (PHQ-9), tips for administering the screening test, contact information and much more.
• The PHQ-9 is completed by patients in your office and is easily accessible in multiple languages at www.phqscreene.rs.
• The purpose of the PHQ-9 is to screen for depression.

Who should I screen?

• Blue Cross Community Centennial members who are 18 years of age and older
• Blue Cross Community Centennial members without an active diagnosis of depression, bipolar disorder or other mood symptoms.

Patients who are not eligible or may not be clinically indicated for the depression screening measurement:

• Patients who have had an annual depression screen or refuse to participate
• Patients who are in an urgent or emergent situation where a delay in treatment may jeopardize the patient’s health status
• Patients whose functional capacity or motivation to improve may impact the accuracy of results (e.g., certain court-appointed cases or cases of delirium)
• Patients who already have an active diagnosis of depression or bipolar disorder

Practice guidelines are meant to serve as general guidelines and are not intended to substitute for clinical judgment in individual cases.
The Patient Health Questionnaire (PHQ-9) is a publicly available screening tool available from Pfizer Inc.
All providers referenced in this document are not employed by and are independent from BCBSNM.
Such services are funded in part with the State of New Mexico.
Blue Cross and Blue Shield of New Mexico, a Division of Health Care Service Corporation, a Mutual Legal Reserve Company, an Independent Licensee of the Blue Cross and Blue Shield Association.
**Patient Health Questionnaire - 9 (PHQ-9)**

Over the last 2 weeks, how often have you been bothered by any of the following problems? (Use “/” to indicate your answer)

<table>
<thead>
<tr>
<th>Problem</th>
<th>Not at all</th>
<th>Several days</th>
<th>More than half the days</th>
<th>Nearly every day</th>
</tr>
</thead>
<tbody>
<tr>
