# Blue Cross Community Centennial<sup>SM</sup> Drug List

October 2019

This document contains information about  
the drugs we cover in this plan.

Effective: October 1, 2019

Blue Cross  
Community Centennial<sup>SM</sup>

## What is the Blue Cross Community Centennial drug list?

The drug list (sometimes called a "formulary") is a list showing the drugs that can be covered by your Blue Cross Community Centennial health plan. The drugs listed will be covered as long as you:

- Have a medical need for them
- Fill the medication orders at an in-network pharmacy
- Follow the other rules of your Blue Cross Community Centennial health plan

For more information on how to fill your medication orders, please review your Member Handbook. You may also contact Blue Cross and Blue Shield of New Mexico (BCBSNM) Member Services at **1-866-689-1523** (TTY/TDD **711**).

## What will I pay?

In most cases you do not pay for covered drugs. Some members will have prescription copays depending on their category of eligibility.

## Can the drug list change?

Yes, it can change for various reasons such as a new, less expensive generic drug becomes available.

You will be told in writing when changes are made to the drug list.

## How do I use the drug list?

There are two ways to find your drug in the list beginning on page 1.

### 1. Category

- The list of covered drugs that begins on page 1 gives you information about the drugs covered by Blue Cross Community Centennial. If you have trouble finding your drug in the list, turn to the Index that begins at the back of this book.
- The first column of the chart has the name of the drug. Brand name drugs are capitalized (e.g., CIPRO) and generic drugs are listed in lower-case italics (e.g., *ciprofloxacin*).

— The information in the "Necessary actions, restrictions, or limits on use" column tells you if Blue Cross Community Centennial has any rules for covering your drug.

- The drugs are listed in categories, or groups, based on the type of medical conditions they treat. (For example, drugs used to treat a heart condition are listed under Heart and Circulatory Drugs).
- If you know what your drug is used for, look for the group in the drug list. Then, look under that group for your drug.

### 2. Alphabetical Listing

- Look for your drug in the index at the back of this book.
- Next to your drug, you will see the page number where you can find coverage information.

## What are generic drugs?

A generic drug is approved by the Food and Drug Administration (FDA) as having the same active ingredient as the brand name drug, but often costs less.

## Does the plan cover over-the-counter (OTC) drugs?

Yes, Blue Cross Community Centennial covers certain OTC drugs with a valid medication order from your health care provider, and you may get those at no cost. Generic OTC drugs are to be prescribed and filled by your pharmacy when available. These OTC drugs must be filled at a pharmacy that participates in the Blue Cross Community Centennial network and for quantities up to a 30-day supply. Many of the OTC drugs found on the drug list have an age restriction depending on what type of coverage you have.

## Are there any limits on my coverage?

Some drugs are subject to age restrictions. These restrictions are based on Food and Drug Administration (FDA), manufacturer, or clinical guidelines. Age restrictions are used as a safety measure for members to use medications appropriately. You can find out if your drug has any other conditions or limits by looking at the drug list that begins on page 1. The date we last updated the list is shown on the front cover page.

Added conditions or limits on some covered drugs may include:

- **Prior Authorization:** You or your provider may need to get approval from Blue Cross and Blue Shield of New Mexico (BCBSNM) before you fill some of your medication orders. Medications that require prior authorization are identified in the drug list by a “PA” in the “Necessary actions, restrictions, or limits on use” column. If you do not get approval, Blue Cross Community Centennial may not cover (pay for) the drug.

#### **– What if my drug requires a prior authorization?**

- Contact BCBSNM Member Services at **1-866-689-1523** (TTY/TDD **711**) and ask how you or your provider can submit a prior authorization (exception) request.
- You can also talk to your provider to decide if you should first try a different drug on our list before you request an exception.

- **Quantity Limits:** For certain drugs, Blue Cross Community Centennial limits the amount of a drug that will be covered for a period of time (e.g., no more than 60 tablets for 30 days). Medications that have quantity limits are identified in the drug list by a “QL” in the “Necessary actions, restrictions, or limits on use” column.

#### **– What if my drug is not covered because it exceeds the quantity limit?**

- Contact BCBSNM Member Services at **1-866-689-1523** (TTY/TDD **711**) and ask how you or your provider can submit a quantity limit exception request.
- You can also talk to your provider to decide if you should first try a different drug on our list or different dose of your medication before you request an exception.

- **Step Therapy:** In some cases, Blue Cross Community Centennial requires you to first try certain drugs before another drug can be covered. For example if Drug A and Drug B both treat your medical condition, the plan may not cover Drug B unless you try Drug A first. If Drug A does not work for you, the plan will then cover Drug B. Medications that are subject to step therapy are identified in the drug list by an “ST” in the “Necessary actions, restrictions, or limits on use” column.

#### **– What if my drug is not covered because I have not met the step therapy?**

- Contact BCBSNM Member Services at **1-866-689-1523** (TTY/TDD **711**) and ask how you or your provider can submit a step therapy exception request.
- You can also talk to your provider to decide if you should first try a different drug on our list that does not require step therapy.

- **Morphine Equivalent (ME) Dosing:** ME dosing is a tool used to help prevent members from taking too much pain medication (opioids). This tool allows BCBSNM to calculate the total daily dose of pain medications a member is taking no matter which opioid they are prescribed. The current daily ME limit in New Mexico is 90 mg per day. If you are taking a dose above ME90, you will need to get prior authorization (approval) from BCBSNM for Blue Cross Community Centennial to pay for the prescription(s). Medications that have morphine equivalents are identified in the drug list by an “ME” in the “Necessary actions, restrictions, or limits on use” column.

- **Opioid Limits:** All opioids are subject to a 90% refill threshold. This means 90% of the original fill must be used before a second fill can be paid. If you don't chronically take opioids on a daily basis, you are considered opioid naive. Opioid naive members are limited to a seven-day supply of immediate release (IR) opioids for their first fill. Once you have a history of IR opioids, you can fill more than seven days. You must have a history of IR opioids before you can fill an extended release (ER) opioid. If you do not have a history of IR opioids, you will need to get prior authorization from BCBSNM to fill an ER opioid. You will also need to get a prior authorization from BCBSNM to take a benzodiazepine and an opioid at the same time.

- **Oral Oncology Split Fill Program:** Oncology is the study of cancer. Oral oncology drugs are medications that are taken by mouth for the treatment of various types of cancer. These drugs are an important part of many treatment plans. These drugs can cause side effects which may lead to your doctor making changes to the dose or stopping the drug entirely. As you go through treatment, your doctor may make changes to the treatment plan until the best dose is established for you. This may take a few months.

The reason for the Oral Oncology Split Fill Program for members newly starting therapy is to:

- Prevent unnecessary prescriptions at inappropriate doses.
- Minimize waste of these drugs.
- Manage side effects.

For the first 2 to 3 months of your treatment, you will receive a 14- or 15-day supply of your prescription twice a month. Following the first 2 to 3 months of treatment and once the right dose has been established, you may start to receive a full 1-month supply for the rest of your therapy. In the drug list, any drug that is labeled "SF" (Split Fill) falls under the Oral Oncology Split Fill Program.

## What if my drug is not on the drug list?

Contact BCBSNM Member Services at **1-866-689-1523** (TTY/TDD **711**) and ask if your drug is covered. If you learn that Blue Cross Community Centennial does not cover your drug, you have two options:

- Talk to your provider to decide if you should first try a different drug on our list before you request an exception.
- If your provider feels a different drug would not be appropriate, they can request a prior authorization. A prior authorization is a request asking Blue Cross Community Centennial to make an exception to cover your drug.

Member Services can work with you and your provider to help you ask for an exception. The prescription drug coverage exception form is on MyPrime.com. Providers can submit this coverage exception request form by:

- Fax: **1-877-243-6930**
- Phone: **1-800-285-9426** (TTY/TDD: **711**)
- Website: MyPrime.com or CoverMyMeds.com

## Specialty Pharmacy (SP) Drugs

Specialty drugs are certain prescription medications used to treat complex, chronic conditions like cancer, rheumatoid arthritis and multiple sclerosis. Specialty drugs often require special handling (like refrigeration during shipping) and administration (such as injection or infusion). Specialty pharmacy drugs require prior authorization before a prescription may be filled. They can be filled for up to a 30-day supply. They must be filled by a specialty drug supplier that participates in the network for Blue Cross Community Centennial. AllianceRx Walgreens Prime is the preferred BCBSNM supplier of specialty drugs. Most specialty drugs fall under the pharmacy benefit and can be filled by AllianceRx Walgreens Prime. Specialty drugs under the pharmacy benefit that are unavailable from AllianceRx Walgreens Prime can be obtained from a limited distribution pharmacy provider. Limited distribution pharmacy providers are identified by pharmaceutical manufacturers as having the highest standards for clinical expertise, patient education, service, treatment monitoring and support. For more information about specialty drugs, contact Member Services at **1-866-689-1523** (TTY/TDD **711**).

## Which drug categories are not covered by the Plan drug list?

The following drug categories are not covered by your Blue Cross Community Centennial health plan:

- Anorexia, weight loss, or weight gain drugs
- Bulk chemicals
- Cosmetic enhancing drugs
- Diagnostic agents
- Drug Efficacy Study Implementation (DESI). These are drugs that are not shown to be safe and effective.
- Experimental and investigational drugs
- Erectile dysfunction drugs prescribed to treat impotence
- Fertility drugs
- General anesthetic drugs
- Opioid cough and cold products (excluded ages <18)
- Over-the-counter products not otherwise included on the plan's drug list
- Surgical supply/medical devices

Blue Cross Community Centennial members who have dual coverage under both Medicare and Medicaid will find that most of their medications will be covered by Medicare. However, a limited number of drugs will be covered under Blue Cross Community Centennial. Some examples of these drugs include:

- Drugs used for the symptomatic relief of cough and colds
- Prescription vitamins and minerals (e.g., folic acid)
- Non-prescription (over-the-counter) drugs
- Non-prescription smoking cessation products

For Medicare Part B-covered drugs, Blue Cross Community Centennial members who are enrolled in both Medicare and Medicaid may be able to have their coinsurance covered under their Medicaid benefit. However, some drugs are only covered under Medicare Part B if a member has a specific medical condition or received a specific medical treatment. In some cases, medical history information will need to be reviewed first in order to cover a member's coinsurance. Members should call Member Services at **1-866-689-1523** (TTY/TDD **711**) to have this coverage determination completed.

## Continuous Glucose Monitors and Supplies

BCBSNM has changed our process for providing continuous glucose monitors and supplies. A continuous glucose monitor is a device that tracks blood sugar levels throughout the day. If your current Durable Medical Equipment (DME) provider is no longer eligible to provide your device and supplies as a result of this change, you will need to get these products from a different provider in our network. BCBSNM can help you find a new provider. If you are impacted by this change, you should have received a letter that will help you with this new process. BCBSNM has informed the prescribers and DME providers of impacted members about this change. If you need help finding an in-network provider, call Member Services at **1-866-689-1523** (TTY: **711**).
